 **Mint** A Fresh Look at your Site

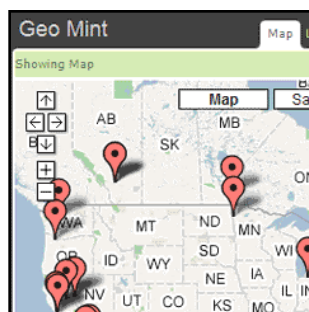

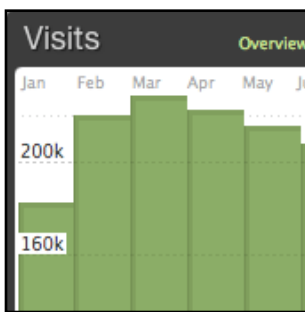

The web is listening to what you have to say. Admiring your design. Talking about your product.

Mint helps you identify where the most interest is being generated and over what.

 [See live demo of Mint](#)

Mint is a web site analytics program that presents complicated data in very simple terms. The number of total hits, the number of unique visitors, which pages are the most popular and which need improvement – it can all be viewed at-a-glance from Mint’s elegantly designed online dashboard.

Hits	Keywords
2,437	sweet Found ShaunInman.com/po
391	shaun inman Found ShaunInman.com/po
203	mint Found ShaunInman.com/po

There are also expansion services that can be added to track even more useful data. You can make sure your visitors are using compatible browsers and screen resolutions. Mint determines which countries and areas your hits are coming from and can plot each visitor on an interactive map with extreme accuracy. You will also find which websites are linking to yours and what search engine terms people are finding you with.
